Listen to your life

We live in a world with sound. Every day we perceive the various forms of the word through sound. Can you imagine that if one day suddenly we can no longer hear... Yesterdays you were still laughing with your family at the dinner table. Today you turned around and fell off a piece of tableware, but you couldn’t hear it. Yesterdays you were still in the office with the sound of a keyboard. But today you are late because you can’t hear the ringing sound. Yesterdays you were glad that you had caught the first subway. Today you almost lost your life because you could not hear the horn behind you. Did you find out that parents are talking more and more loudly when making phone calls; The volume key + on the tv set is beginning to blur. You told a joke at the dinner table and looked up and see only the confusion on their faces. You think it’s a weak feeling. It’s not until you see the fear and loneliness in your parents’ eyes that you understand that they just can’t hear. Their world gradually lost its voice, then became scared, lonely and lost the vitality of life. What can we do for them or ourselves? To enjoy our reunion with our family, our talk with our friends, and the music of nature. To enjoy the beauty from the sound again, let’s start a new journey with jinghao.
